## **Abstracts**

According to our (Global Info Research) latest study, the global Wrist Dive Computers market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A wrist dive computer is the one that can take depth and time information and applies it to a decompression model to track the dissolved nitrogen in your wrist tissue during a dive. Your computer continuously tells you how much dive time you safely have remaining. Your computer combines a depth gauge, timer and sometimes a submersible pressure gauge (SPG) into a single, useful instrument. This is immensely useful when it comes to avoiding decompression sickness.
