Abstracts

Anti-X-ray resin board is a plastic shielding material that provides effective radiation protection and has all the shielding properties of lead, but without the hazards of lead. Typically made from high-tungsten compounds, this material is a safe and non-toxic alternative for protecting personnel and sensitive components from X-ray radiation. It is particularly important in pharmaceutical or non-destructive materials testing as it provides effective protection against radiation while meeting mechanical requirements and being suitable for a variety of applications.
