In terms of product type, Pulsed Flash Lamp is the largest segment, occupied for a share of about 65%, and in terms of application, Industrial has a share about 30 percent.

A xenon flash lamp is an electric lamp that produces pulsed flashes or brief flashes of intense white light. When an accumulated energy in a storage capacitor is released and dissipated, it forms highly excited xenon plasma within the flash-lamp. Xenon flash are more compact than continuous mode lamps and build up less heat. They provide a high-intensity continuous spectrum, from deep ultraviolet to ultraviolet to visible to infrared light. Xenon flash lamps are used in various applications such as laser pumping or as a heat source.
