## Abstracts

According to our (Global Info Research) latest study, the global Xylooligosaccharides (XOS) market size was valued at USD 31 million in 2023 and is forecast to a readjusted size of USD 34 million by 2030 with a CAGR of 1.4% during review period.

Xylo-oligosaccharides, also named as XOS, is a type of functional polymer sugar composed of 2-7 xylose molecules bonded with ? (1-4) glycosidic bonds. XOS product specifications in the market: including: 95% XOS powder, 70% XOS powder, 35% XOS powder, 20% XOS powder, 70% XOS syrup.

Compared with other functional oligosaccharides, such as fructo-oligosaccharide (FOS) and galacto-oligosaccharide (GOS), the consumption of XOS in China increased quite slowly in recent years, due to its small serving size in downstream products and its low popularity among the Chinese public. Although FOS is currently the main functional oligosaccharide consumed in developed countries, its efficacy is not as good as that of XOS. Besides, the public's health consciousness in developed countries, such as the US, are higher than in China, which hints that products with health care function will be more popular in these countries.
