According to our (Global Info Research) latest study, the global Yeast Protein Expression Service market size was valued at US$ 291 million in 2024 and is forecast to a readjusted size of USD 499 million by 2031 with a CAGR of 8.1% during review period.

Yeast protein expression services are defined as the outsourcing of yeast protein expression by specialised market vendors, in which they conduct yeast protein expression on behalf of their customers and share the studies and research findings with them. Yeast can be used to express secreted and cytoplasmic proteins. The methylotrophic yeast Pichia pastoris is especially useful for producing secreted proteins, including those with disulfide bonds.

Yeast expression system is one of the common methods for expressing eukaryotic proteins. It has the advantages of easy culture, low cost, and easy operation, and can be used for industrial scale expression. Several pharmaceutical companies outsource their R&D projects to various contract research organizations, which is expected to drive the yeast protein expression services market.
