Yttria-stabilized zirconia beads are a type of zirconia grinding media, typically containing around 95% zirconia therefore also known as '95 zirconia.' As a ceramic grinding ball, YSZ (yttria-stabilized zirconia) grinding media feature high density, mechanical strength, chemical stability, and a low coefficient of thermal expansion. Consequently, this material not only ensures high grinding efficiency but also exhibits extremely low wear rates (in ppm levels), which can prevent contamination and result in a long service life. It can be used for ultrafine grinding of materials with high viscosity and high hardness.
