Abstracts

The global Yttrium Nitride market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Yttrium nitride is hard ceramic material similar to titanium nitride and zirconium nitride. The nitrides of lanthanum, scandium, and yttrium show semiconducting properties and additionally the lattice structure of YN differs only by 8% from that of gallium nitride. This makes YN a possible buffer layer between a substrate and the GaN layer during GaN crystal growth.

This report studies the global Yttrium Nitride production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Yttrium Nitride, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Yttrium Nitride that contribute to its increasing demand across many markets.
