Zeolite Clinoptilolite supplements are dietary products derived from clinoptilolite, a natural type of zeolite mineral with a porous structure. These supplements are often marketed for their purported health benefits, including detoxification, improved digestion, and enhanced immune function. The clinoptilolite zeolite is known for its high cation-exchange capacity, allowing it to capture and remove toxins, heavy metals, and other harmful substances from the body. Typically taken in powder or capsule form, these supplements are believed to support overall well-being by aiding in the body's natural detoxification processes. However, it's essential to note that scientific evidence supporting these health claims is still limited, and consumers should consult healthcare professionals before incorporating such supplements into their regimen.
