Abstracts

According to our (Global Info Research) latest study, the global Zeolite Supplements market size was valued at US\$ 3426 million in 2024 and is forecast to a readjusted size of USD 4765 million by 2031 with a CAGR of 4.9% during review period.

Zeolites are minerals that contain mainly aluminum and silicon compounds. They are used as drying agents, in detergents, and in water and air purifiers. Zeolites are also marketed as dietary supplements to treat cancer, diarrhea, autism, herpes, and hangover, and to balance pH and remove heavy metals in the body. Countless studies have demonstrated that specific zeolites have chelating properties that allow them to absorb and effectively neutralize many toxic and radioactive elements, including cesium – a radioactive byproduct of nuclear fission. Powdered zeolites have effectively cleaned up toxic spills and reduced environmental toxins, especially in significant incidents like Chernobyl, Fukushima, and other nuclear disasters. The ability of zeolites to trap toxic elements led to the development of dietary supplements designed to detoxify the body of heavy metals. As it stands, zeolite supplements are taken by thousands of people planetwide.

This report is a detailed and comprehensive analysis for global Zeolite Supplements market.
