According to our (Global Info Research) latest study, the global Zero Backlash Bellows Coupling market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

A zero backlash bellows coupling is a mechanical coupling used to connect two shafts to transmit rotational motion. Its design features a bellows as the flexible portion connecting the two ends. This bellows has zero backlash (also known as zero clearance) properties, meaning it has no perceptible gap or play between the connecting shafts. This type of coupling is useful in applications where high-precision position transmission and zero-backlash connections are required.
