According to our (Global Info Research) latest study, the global Zero-Bias Diode Detectors market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Named after German physicist Walter H. Schottky, the Schottky diode is a semiconductor diode made by combining a semiconductor with a metal. A zero-bias Schottky diode detector is an RF power detector that operates without a bias voltage. These devices can be used in many applications that do not require a main DC power source when in standby or listening mode.
