## Abstracts

The global Zinc Acetate Tablets market size is expected to reach \$ 269 million by 2032, rising at a market growth of 5.3% CAGR during the forecast period (2026-2032).

Zinc Acetate is a common organic zinc salt compound, and its mainstream clinical preparation is Zinc Acetate Tablets, belonging to mineral supplementary drugs. It can effectively supplement zinc elements for the human body, participate in the synthesis and metabolic regulation of various enzymes, and maintain immune function, skin and mucosal health and normal physiological activities. With mild astringent and antioxidant properties, Zinc Acetate is widely used for the prevention and treatment of zinc deficiency, and adjuvant treatment of related metabolic disorders. It has stable physicochemical properties, mature preparation technology and high medication safety, enjoying extensive application value in medicine, health care products and pharmaceutical raw material industries. In 2025, the global production volume of Zinc Acetate Tablets reached approximately 12.5 million bottles.

The global market for Zinc Acetate has maintained steady development in recent years, with applications spanning pharmaceuticals, feed, rubber, electronics, new energy and other fields. Demand continues to benefit from the stable expansion and upgrading of downstream industries. The global supply pattern shows a trend of concentration, with leading enterprises dominating by virtue of technological, production capacity and environmental compliance advantages, while the industry is accelerating its transformation toward high-end, green and intensive development. The demand for high-purity Zinc Acetate in pharmaceutical and health care products is increasing, driving the optimization of product structure; the expansion of emerging fields such as new energy batteries and high-performance rubber has injected new growth momentum into the market. In addition, stricter environmental policies have forced the elimination of

backward production capacity, and industry competition has gradually shifted from price wars to comprehensive competition in quality, technology and supply chain stability, making the overall market outlook continue to be positive?
