Zinc sulfide is a yellowish-white powder in a liquid, insoluble in water and denser than water. Primary hazard is to the environment. Immediate steps should be taken to limit spread to the environment. Easily penetrates the soil to contaminate groundwater and nearby waterways.

Scope of the Report:

This report focuses on the Zinc Sulfide in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In the coming years there is an increasing demand for Zinc Sulfide in the regions of North America, Asia-Pacific and Europe that is expected to drive the market for more Zinc Sulfide. Growth in government budgets in the principal countries, increasing of optical materials expenditures, more-intense competition, renovation of old technology will drive growth in North America, Asia-Pacific and Europe markets.

Globally, the Zinc Sulfide industry market is not concentrated as the manufacturing technology of Zinc Sulfide is relatively matures than some high-tech equipment. And some enterprises, like Dow, Weifang Sunny, Talvivaara, etc. are well-known for the wonderful performance of their Zinc Sulfide and related services. Asia-Pacific occupied 46.76% revenue market share in 2016 and is remarkable in the global Zinc Sulfide industry because of the demand of Zinc Sulfide.

The product average price declined in the past few years due to the technology development, the average price will keep the trend in the few future years due to increasing mature manufacturing technology and lowing cost of raw materials.

The impact on the cost and availability of raw materials and certain components is uncertain due to potential supply changes. The costs of raw materials have a significant impact on the level of expenses. If the prices of raw materials and related factors such as energy prices increase, and if new companies cannot pass those price increases on to customers, their results of operations and financial condition would suffer.

Although the market competition of Zinc Sulfide is fierce globally, there are many enterprises can obtain considerable profit form the manufacturing and marketing of Zinc Sulfide and that is the reason that we believe there will also be enterprises enter this market. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.

The worldwide market for Zinc Sulfide is expected to grow at a CAGR of roughly 3.7% over the next five years, will reach 160 million US\$ in 2023, from 130 million US\$ in 2017, according to a new GIR (Global Info Research) study.
