Abstracts

The global Zirconia Grinding Media market size is expected to reach \$ 1289 million by 2032, rising at a market growth of 6.2% CAGR during the forecast period (2026-2032). Global sales of zirconia grinding media reached 57,000 tons in 2025, with an average price of US\$14,235 per ton.

Zirconia (YSZ) grinding media is the most durable and efficient media for ball milling and attrition milling of ceramic materials. Zirconia grinding media provides a virtually contamination-free ball milling solution for a variety of industries.

Over 94% of the raw material costs come from high-purity ZrO₂ powder and Y₂O₃ stabilizers. ZrO₂ powder costs 60,000-80,000 RMB/t, and Y₂O₃ costs approximately 250,000-300,000 RMB/t, together accounting for 90% of the raw material expenditure per ton of beads. The remainder consists of dispersants, binders, sintering energy consumption, and labor, with manufacturing costs accounting for 10-12%. The gross profit margin is 20-25%, and fluctuations in zirconium powder prices are the most sensitive variable to profitability.

This report studies the global Zirconia Grinding Media production, demand, key manufacturers, and key regions.
