Abstracts

The global Zirconia Nano Powder market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Zirconia Nano Powder

It has the characteristics of strong thermal shock resistance, high temperature resistance, good chemical stability, and outstanding material compounding. Combining nano-zirconia with other materials (Al_2O_3 , SiO_2) can greatly improve the performance parameters of the material, improve its fracture toughness, bending strength, etc. Therefore, nano-zirconium dioxide is not only used in the field of structural ceramics and functional ceramics, but also used to improve the surface properties of metal materials (thermal conductivity, thermal shock resistance, high temperature oxidation resistance, etc.). Utilizing the conductive properties of nano-zirconium dioxide doped with different elements, it is used in electrode manufacturing in high-performance solid batteries.

This report studies the global Zirconia Nano Powder production, demand, key manufacturers, and key regions.
