Zirconium basic carbonate is a white powder and an important inorganic compound. Zirconium basic carbonate is the basic raw material for preparing zirconium salts and is widely used in functional ceramics, structural ceramics, automobile exhaust treatment and other fields. In organic synthesis, zirconium basic carbonate can be used as a catalyst precursor to improve the activity and selectivity of the catalyst. Zirconium basic carbonate is also used to manufacture substrate materials for liquid crystal displays. Due to its high thermal and chemical stability, it can ensure the long-term stability of liquid crystal displays. It is also widely used in coatings, papermaking, leather, cosmetics, paint driers and other fields, and is the most economical raw material for producing ultrafine zirconium dioxide.
