Abstracts

According to our (Global Info Research) latest study, the global Zoom Dissecting Microscope market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Zoom dissecting microscopes provide a 3-dimensional or 'stereo' image when looking through the microscope. The zoom feature on the stereo zoom microscope provides a range of viewing possibilities, and is the single feature that is most useful when selecting a stereoscope. The zoom knob on a stereo microscope provides magnification within a large range (for example, 0.7x - 4.5x) and ultimately allows the ability to view every single magnification (7x, 8x, 9x, etc.) when zooming in on the microscopy sample. Stereo zoom microscopes allow quick zoom from low to high magnification. Using a stereo zoom microscope makes it simple to view a sample in the entire field of view, then focus and zoom in on a particular part of interest.
