According to our (Global Info Research) latest study, the global Gyro Compass market size was valued at US\$ 247 million in 2024 and is forecast to a readjusted size of USD 331 million by 2031 with a CAGR of 4.3% during review period.

A gyro compass is a type of non-magnetic compass which is based on a fast-spinning disc and the rotation of the Earth to find geographical direction automatically. Unlike magnetic compasses, which point towards the magnetic North Pole, a gyro compass points towards the true North Pole, or geographical North, providing a significantly more accurate navigation tool for maritime applications. Although an important part of the gyro compass is the gyroscope, they are not the same equipment.

Global key players of Gyro Compass include Raytheon Anschütz, YDK Technologies, TOKYO KEIKI INC., etc. The top three players hold a share over 42%. Europe is the largest market, and has a share about 35%, followed by Asia-Pacific and North America with share 31% and 26%, separately. In terms of product type, Fiber Optic Gyro Compass is the largest segment, occupied for a share of 69%. In terms of application, Commercial Shipping has a share about 43 percent.
