Hernia Balloon is a medical device used during hernia repair surgeries, specifically in minimally invasive procedures such as laparoscopic hernia repair. The balloon is inserted into the abdominal cavity and then inflated to gently push surrounding organs and tissues aside, providing the surgeon with a clear view and more space to work. This helps in accurately placing mesh or sutures to repair the hernia without causing significant damage to surrounding tissues. The use of a hernia balloon can reduce operative time, minimize tissue trauma, and improve overall surgical outcomes.
