According to our (Global Info Research) latest study, the global High Purity Oleic Acid market size was valued at US\$ 126 million in 2023 and is forecast to a readjusted size of USD 207 million by 2030 with a CAGR of 6.1% during review period.

High purity oleic acid is a kind of oleochemicals. The oleochemicals are mainly basic oleochemicals, including fatty acids, fatty alcohols, fatty amines and glycerol. Fatty acids mainly include stearic acid, oleic acid, cinnamic acid and so on. High purity oleic acid (?80%) is a special category of oleic acid, can be used in food, medicine, cosmetics and other industries.

The future development trends of high-purity oleic acid are as follows:

1. Competition intensifies in international market for high-purity oleic acid:

The global market for high-purity oleic acid is increasingly competitive. Multinational companies expand their market share through mergers and acquisitions, such as Synthomer's acquisition of Eastman Chemical's adhesive resins business and seek new growth points. At the same time, emerging economies such as China are also actively deploying this field, trying to occupy a place in the global market.

2. Some regions (such as China) lack self-sufficiency and rely on imports for a large amount of demand:

Global high-purity oleic acid is mainly concentrated in Japan, India, Malaysia and other Asian regions and Italy and Germany and other European regions, such as IOI Oleochemical in Malaysia, NOF CORPORATION and Kao in Japan and Synthomer and Green Oleo in Europe. Even though China already has Hangzhou Zanyu Oleo Technology and Zibo Huitong and other companies producing high-purity oleic acid, China's demand for high-purity oleic acid will still depend on imports for some time to come.

3. Downstream drives the continuous growth of market demand for high purity oleic acid:

High purity oleic acid should be widely used in medicine, cosmetics and other industries. Downstream products have higher profitability and market space, and due to the pursuit of environmental protection by enterprises, high-purity oleic acid is increasingly popular with enterprises. It can be predicted that the market demand for high-purity oleic acid will continue to grow in the future.
