According to our (Global Info Research) latest study, the global Hydrogel Colored Contact Lenses market size was valued at US\$ 1094 million in 2024 and is forecast to a readjusted size of USD 2039 million by 2031 with a CAGR of 9.4% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Hydrogel Colored Contact Lenses are colored contact lenses made of hydrogel material. Hydrogel is a high molecular polymer material with good hydrophilicity and air permeability. It can absorb a lot of water to keep the lens soft and moist. Hydrogel colored contact lenses combine the dual functions of vision correction and eye beautification. Through different colors and pattern designs, they can change or enhance the appearance of the wearer's eyes.

The target consumers of hydrogel colored contact lenses are mainly young people, especially women between the ages of 18 and 35. This group has high requirements for fashion and appearance, so contact lenses need to not only meet the needs of vision correction, but also have aesthetic functions, such as changing pupil color and enlarging the appearance of the eyes. In addition, with the increase of urban life pressure and screen time, dry eyes are more common, and hydrogel contact lenses with moisturizing and high oxygen permeability have also attracted much attention. Hydrogel colored contact lenses are divided into two categories in the market: daily disposable and long-wear. Daily disposable contact lenses are favored by more consumers because of their hygiene and convenience, while long-wear (such as monthly disposable, annual

disposable, etc.) are more suitable for people with limited budgets or who are accustomed to wearing contact lenses for a long time. In addition, with the rise of functional contact lenses, hydrogel contact lenses with functions such as anti-blue light and UV protection have begun to appear on the market.
