A juice extractor is a tool for separating juice from fruits, herbs, leafy greens and other types of vegetables from its pulp in a process called juicing. In separating the pulp, juice extractors concentrate the nutrition naturally present in fruits and vegetables which allows the body to more easily absorb the nutrition than digesting the solid produce. The use of juice extractors also makes it easier to consume more raw produce. Some juice extractors of the masticating or twin gear variety perform extra functions too, such as crushing herbs and spices, and extruding pasta.

The major players in global Juice Extractors market include Omega, Cuisinart, Braun, etc. The top 3 players occupy about 20% shares of the global market. Asia-Pacific and Europe are main markets, they occupy about 55% of the global market. Centrifugal Juicer is the main type, with a share about 50%.
