According to our (Global Info Research) latest study, the global Laparoscopy Simulators market size was valued at US\$ 42350 million in 2024 and is forecast to a readjusted size of USD 59900 million by 2031 with a CAGR of 5.1% during review period.

A Laparoscopy Simulator is a minimally-invasive surgical simulation training tool intended for learners and medical professionals alike. Laparoscopic training simulators are tools that can be used in training scenarios focused on laparoscopic surgery, as they demonstrate virtually all major abdominal surgical procedures. With Laparoscopic Surgery Simulators, learners can begin to familiarize themselves with the performance methodologies.

The supply of laparoscopy simulators in the international market is relatively concentrated. The main manufacturers of laparoscopic simulators include VirtaMed, Simbionix, Adam Rouilly, CAE Healthcare, Surgical Science, etc.; in 2023, the top ten manufacturers in the world accounted for 80% of the total sales.

North America and Europe are the main production areas of laparoscopy simulators. In 2023, the output of laparoscopy simulators in North America accounted for 30% of the global output, ranking first in the world.

In 2023, North America will be the world's largest consumer of laparoscopy simulators, accounting for 41% of global sales.

Currently, the mainstream laparoscopy simulators in the global market are mobile laparoscopic simulators, accounting for 62% of total sales in 2023. In 2023, laparoscopy simulators used in hospitals around the world accounted for 45% of total sales.

Market development trend

Intelligence:

With the continuous development of artificial intelligence technology, laparoscopic simulators will gradually become intelligent and be able to provide more personalized training and guidance services.
