According to our (Global Info Research) latest study, the global Laser Welding and Cutting Robots market size was valued at US\$ 709 million in 2024 and is forecast to a readjusted size of USD 1263 million by 2031 with a CAGR of 8.7% during review period.

Laser welding is a welding technique used to join pieces of metal or thermoplastics through the use of a laser. The beam provides a concentrated heat source, allowing for narrow, deep welds and high welding rates. Laser cutting is a technology that uses a laser to slice materials. Laser cutting works by directing the output of a high-power laser most commonly through optics.

Laser welding and cutting is inherently more precise than traditional welding and cutting.

The market is really concentrated. Top 3 manufacturers took 66% market share in 2019.
