According to our (Global Info Research) latest study, the global Lightweight Concrete Anchors market size was valued at US\$ 1235 million in 2024 and is forecast to a readjusted size of USD 1849 million by 2031 with a CAGR of 6.0% during review period.

Lightweight Concrete Anchors are fastening devices designed to secure objects or structures to concrete surfaces, while being lighter in weight compared to traditional concrete anchors. These anchors are specifically designed to be used in lightweight or thinner concrete applications, where using heavier or larger anchors could be unnecessary or impractical. They are particularly useful for installations in areas where concrete weight or depth is limited, such as in thinner or hollow concrete slabs, or for applications where weight reduction is critical.
