## Abstracts

According to our (Global Info Research) latest study, the global Liposome Development Service market size was valued at US\$ 1168 million in 2023 and is forecast to a readjusted size of USD 1973 million by 2030 with a CAGR of 7.9% during review period.

Liposomes are a type of nano-sized phospholipid bubbles, which have attracted much attention as potential drug carriers. Liposomes are highly biocompatible and easy to control in vivo and can be loaded with a broad variety of drugs, DNA, and diagnostic agents. To date, a variety of liposomal drugs are under development and some of them are already approved for clinical use.

### Market Driver

The liposome development service market is driven by the growing demand for advanced drug delivery systems that enhance the bioavailability, efficacy, and safety of therapeutics. Liposomes, being biocompatible and capable of targeted drug delivery, are increasingly used in the development of treatments for cancer, infectious diseases, and vaccines. Additionally, the rise in biologics and personalized medicine, coupled with advancements in nanotechnology, supports the growth of the liposome development service market.

### Market Challenge

Despite its potential, the liposome development service market faces challenges such as high production costs and complex manufacturing processes that require specialized expertise and facilities. Regulatory hurdles in the approval of liposome-based therapies and the potential for stability issues during storage and transportation further constrain the market's growth. These factors create barriers, particularly for smaller companies with limited resources.

Global key players of liposome development service include Precision NanoSystems,

Evonik, Merck KGaA, Genevant Sciences, Exelead, etc. The top two players hold a share over 52%. North America is the largest market, has a share about 61%, followed by Europe and Asia-Pacific, with share 26% and 11%, separately. In terms of product type, Lipid Nanoparticles is the largest segment, occupied for a share of 62%, and in terms of application, Commercial has a share about 86 percent.
