Low Profile Floor Jack is a hydraulic tool designed for low-profile vehicles and is commonly used in automobile repair and maintenance. Compared with traditional jacks, low profile floor jacks have a lower lifting height, which allows them to easily enter vehicles with low bottoms for lifting. They are particularly suitable for sports cars, sports cars or other cars with low chassis. Its structure usually includes a solid metal base, hydraulic pump, lifting arm and support wheels. When operating, the hydraulic pump is pushed by the handle to drive the hydraulic oil into the lifting system, thereby achieving smooth lifting and lowering of the vehicle.
