A Low Profile Gastrostomy Tube (LPGT) is a type of feeding tube that is inserted directly into the stomach through a small incision in the abdomen. Unlike traditional gastrostomy tubes, LPGTs are designed to be flatter and more discreet, sitting closer to the skin. This low-profile design makes them less likely to get caught on clothing or other objects, improving comfort and reducing the risk of accidental dislodgement. LPGTs are commonly used for individuals who need long-term enteral feeding due to conditions that prevent normal swallowing or food intake.

Fresenius Kabi, Cardinal Health and Nestle are the top 3 companies in global gastrostomy feeding tube (G-tube) market and account for about 40% of total market share. Geographically speaking, Americas holds about 35% of global market share, followed by APAC with about 30% share. In terms of type, low profile G-tube segment holds an important share of over 50%. In terms of application, over 60% of the gastrostomy feeding tube (G-tube) are for adult.
