Abstracts

According to our (Global Info Research) latest study, the global Marine Infrastructure Coatings market size was valued at US\$ 3322 million in 2024 and is forecast to a readjusted size of USD 4533 million by 2031 with a CAGR of 4.6% during review period.

Marine Infrastructure Coatings can protect against chloride ion corrosion for a long time and effectively protect metal and other materials from being corroded by seawater. Excellent corrosion resistance, resistant to moisture atmosphere, acid rain, sea water and salt spray corrosion, and extremely stable to petroleum and petrochemical products and organic solvents.

The distribution ratio of global marine facility coatings varies due to differences in regional economic development, natural resources, technological levels and government policies.

North America is one of the world's important facility coating consumption regions, accounting for about 11-15% of the world's marine facility coatings. Europe's marine facility coatings consumption is about 10%. The Asia-Pacific region is also an important participant in marine facility coatings. Among them, China has become the country with the fastest growth in offshore wind power installed capacity in the world in the past few years, and Asia's offshore wind power facilities account for 10-15% of the world. The South China Sea and Southeast Asia are both important offshore oil production areas. In recent years, China's consumption of marine facility coatings has been more than 20%, making it the country with the largest increase in demand for marine facility coatings. This trend will remain unchanged in the future.

At present, internationally renowned paint brands such as AkzoNobel, Hempel, CMP,

PPG Industries, and Jotun have opened production bases in China with their technology, brand, and management advantages. Nippon Paint, Sherwin-Williams, and PPG have established their own factories and laboratories in China, forming a foreign monopoly on the high-end market of heavy-duty anti-corrosion coatings in China. The main manufacturers of marine facility coatings in China include Zhejiang Yutong, Zhejiang Bridge Paint, Yongji Paint, and China Shipbuilding Industry Corporation Coatings. Except for a few important leading enterprises, domestic manufacturers generally have small production capacity, few high-end products, and fierce market competition.
