## Abstracts

According to our (Global Info Research) latest study, the global Mechanical Logging Bulldozer market size was valued at US\$ 339 million in 2025 and is forecast to a readjusted size of US\$ 422 million by 2032 with a CAGR of 3.2% during review period.

In 2025, global production of mechanized logging bulldozers reached 7,691 units, with an average selling price of US\$41,250 per unit. The global annual production capacity of mechanized logging bulldozers is approximately 12,000 units, with a gross profit margin of approximately 28.2%. Mechanized logging bulldozers are engineering machines that combine the functions of logging, hauling trees, and clearing logging sites. These machines are based on ordinary bulldozers but are equipped with specialized logging devices (such as logging blades and winches) and optimized for forestry environments. Upstream raw materials for mechanized logging bulldozers include engines, logging clamps, log grapples, and frame reinforcement components. The midstream consists of mechanized logging bulldozer manufacturers, while the downstream primarily serves the forestry, firefighting, and agriculture industries.
