According to our (Global Info Research) latest study, the global Mobile DR Device market size was valued at US\$ 7768 million in 2023 and is forecast to a readjusted size of USD 15830 million by 2030 with a CAGR of 9.0% during review period.

The mobile DR device ensures the accuracy and quality of the output X-rays, and provides safe and stable imaging effects; the low-radiation intensity imaging system can reach the highest protection-free standard level; the built-in large-capacity battery power supply is independent of mains power; the product is light, portable and The operation is simple and fast; it can be used for X-ray diagnosis in indoor and outdoor places of medical units at all levels.

From the perspective of product type, products can be divided into manual and electric, among which electric accounts for the largest proportion due to its superior performance and has a trend of continued improvement.

From the perspective of product market application, mobile DR (Mobile Digital Radiography) can be used in radiology, orthopedics, wards, emergency rooms, operating rooms, ICUs, etc., among which radiology and orthopedics have a larger share, and the two will remain at this proportion in the future.

At present, the world's major manufacturers include Carestream, Shimadzu, Siemens, GE Healthcare, etc. The top five manufacturers account for more than 40% of the sales share. It is expected that the industry competition will be more intense in the next few years.

From the perspective of raw material supply, only some manufacturers in the world have the ability to manufacture core components, and most companies adopt the model of global procurement of parts and assembly; currently, only Wandong in China has the ability to produce all core parts of mobile DR, and it is expected to achieve import

substitution in the future.

North America is the world's largest mobile DR consumption region, with sales accounting for 41% of the world. The Chinese market has changed rapidly in the past few years, and the market accounts for about 16% of the world.
