Abstracts

According to our (Global Info Research) latest study, the global Mobile DR market size was valued at US\$ 7856 million in 2023 and is forecast to a readjusted size of USD 10370 million by 2030 with a CAGR of 8.3% during review period.

Mobile DR is a high frequency combined digital X-ray medical diagnostic equipment. It is suitable for radiology department, orthopedics department, ward, emergency room, operating room, ICU and other places to meet the needs of digital photography of the head, limbs, chest cavity, spine, lumbar spine, abdomen and other parts of the body. It can be as flexible as bedside CR in wards, especially in the gerontology department and comprehensive wards. In addition, it can complete X-ray films of various complex body positions in ICU and operating room. It can even play an irreplaceable role in the emergency scene outside the hospital.

From the perspective of product type, products can be divided into manual and electric, among which electric accounts for the largest proportion due to its superior performance and has a trend of continued improvement.

From the perspective of product market application, mobile DR can be used in radiology, orthopedics, wards, emergency rooms, operating rooms, ICUs, etc., among which radiology and orthopedics have a larger share, and the two will remain at this proportion in the future.

Currently, the world's major manufacturers include Carestream, Shimadzu, Siemens, GE Healthcare, etc. The top five manufacturers account for more than 40% of the sales share. It is expected that industry competition will be more intense in the next few years. From the perspective of raw material supply, only some manufacturers in the world have the ability to manufacture core components, and most companies adopt the model of global procurement of parts and assembly; currently, only Wandong in China has the ability to produce all core parts of mobile DR, and it is expected to achieve import

substitution in the future.

North America is the world's largest mobile DR consumption region, with sales accounting for 41% of the world. The Chinese market has changed rapidly in the past few years, and the market accounts for about 16% of the world.

Market development trend

Diversification: The mobile DR market will show a diversified development trend, including diversification in product types, application fields, and technological innovation.

Intelligence: With the continuous development of artificial intelligence technology, mobile DR equipment will achieve more intelligent image processing and diagnosis functions.

Greening: Under the concept of sustainable development, mobile DR companies should focus on environmental protection and energy conservation, reduce product energy consumption and emissions, and improve resource utilization.
