Mold polishing service refers to a specialized service offered to manufacturers, typically in industries such as injection molding, die casting, and extrusion, where molds play a critical role in the production process. Mold polishing involves the meticulous smoothing, refining, and finishing of the surfaces of molds to achieve the desired level of smoothness, texture, and detail. A well-polished mold surface ensures smoother material flow, reduces the risk of defects such as sink marks and flow lines, and prolongs the lifespan of the mold itself by minimizing wear and tear.
