According to our (Global Info Research) latest study, the global MTT Cell Proliferation and Cytotoxicity Assay Kit market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

MTT Cell Proliferation and Cytotoxicity Assay Kit is a very classic cell proliferation and cytotoxicity assay kit, which is widely used in the detection of cell proliferation and cytotoxicity. MTT can be reduced by some dehydrogenases in mitochondria to generate a crystalline dark purple product, formazan. In the presence of a specific solvent, it can be completely dissolved. Then the absorbance near the wavelength of 570nm can be measured by an enzyme reader. The more and faster the cell proliferation, the higher the absorbance; the greater the cytotoxicity, the lower the absorbance.
