## Abstracts

According to our (Global Info Research) latest study, the global Multifunctional Dynamic DR market size was valued at US\$ 1518 million in 2024 and is forecast to a readjusted size of USD 2571 million by 2031 with a CAGR of 7.9% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

Multifunctional dynamic DR is an advanced medical X-ray diagnostic equipment. Compared with traditional single-function DR equipment, it integrates multiple functions such as film taking, fluoroscopy and imaging. This equipment can perform high-speed, real-time spot film collection for special lesion locations and capture high-definition lesion images, thereby significantly reducing the risk of missed diagnosis and misdiagnosis. In addition, the multifunctional dynamic DR supports multi-angle projection and allows the SID (source-image distance) to move flexibly within a wide range, making it capable of various general and special imaging examination tasks, including but not limited to esophagography, digestive examination Tract angiography, double contrast colon angiography, T-tube angiography and intravenous pyelography (IVP), etc.

This report is a detailed and comprehensive analysis for global Multifunctional Dynamic DR market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application.
