More often, Mutil Band/ Chancel Signal Jammer are able to block all sorts of signals including Cellular, Wi-Fi, GPS, Bluetooth, and Radio Communication. And it can not only cut off all 5G 3G 4G mobile phone signals, but also jam Wi-Fi 2.4G/5GHz GPS LOJACK, RF 315 MHz 433MHz, VHF UHF Walkie-Talkie & Wireless Headset/Microphone signals. Full bands High Power Jammer is power full to blocks all the signals, Jamming frequencies and high jamming radius.

A multi-band signal jammer is an electronic device used to interfere with wireless communication signals in multiple frequency bands, thereby preventing or restricting wireless communication in a specific area. Such devices are often used in military, security, regulatory and other places to prevent malicious use of wireless communication devices or to ensure the security and privacy of specific areas. The working principle of the multi-band signal jammer is to interfere or block the wireless communication signal of the target frequency band by transmitting a specific wireless interference signal, so that the target device cannot communicate normally. The jammer can interfere with multiple frequency bands at the same time, covering a variety of wireless communication technologies, such as 2G, 3G, 4G, WiFi, GPS, Bluetooth, etc. Multi-band signal jammers can be used in military and security applications to prevent malicious use of wireless communication devices to block enemy communications or disrupt radio signals. Using multi-band signal jammers in prisons, conference rooms, government agencies and other places can prevent unauthorized communications and

protect confidential information and personal privacy.
