Abstracts

This report studies the Blood Banking market, and blood banking refers to the process of collecting, separating, and storing blood. A blood bank is a center where blood gathered as a result of blood donation is stored and preserved for later use in blood transfusion. The term 'blood bank' typically refers to a division of a hospital where the storage of blood product occurs and where proper testing is performed (to reduce the risk of transfusion related adverse events). However, it sometimes refers to a collection center, and indeed some hospitals also perform collection.
