## Abstracts

According to our (Global Info Research) latest study, the global XLPE Insulated Cables market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

The cross-linking technology is based on entirely 'dry' cross-linking and cooling process. This eliminates micro inclusions of water from the insulation which, unless prevented, lead to so called 'water treeing' effect. A triple crosshead extrudes the screen over the conductor and screen over insulation in a single technological operation. All that gives the cable excellent electrical, thermal and mechanical properties. XLPE insulated Cable is better than PVC insulated Cable, but the price is a little higher.

The Global Info Research report includes an overview of the development of the XLPE Insulated Cables industry chain, the market status of Utility (Low Voltage Cable, Medium Voltage Cable), Industrial (Low Voltage Cable, Medium Voltage Cable), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of XLPE Insulated Cables.
