## Abstracts

Hemp seeds, or hemp hearts, are the seeds of the hemp plant, or *Cannabis sativa*. Although marijuana comes from the same plant, hemp seeds only contain a trace amount of THC, the active ingredient in marijuana, and they will not get you high. In fact, hemp seeds are safe and very healthy to eat. Hemp Seeds are a gift of nature. They are the most nutritious seed in the world. Hemp Seeds are a complete protein. They have the most concentrated balance of proteins, essential fats, vitamins and enzymes combined with a relative absence of sugar, starches and saturated fats. Hemp Seeds are one of nature's perfect foods - a Super Food. This is one of the most potent foods available, supporting optimal health and well-being, for life. Raw hemp provides a broad spectrum of health benefits, including: weight loss, increased and sustained energy, rapid recovery from disease or injury, lowered cholesterol and blood pressure, reduced inflammation, improvement in circulation and immune system as well as natural blood sugar control.
