Abstracts

This report studies the high-selenium yeast market, high selenium yeast is a form of supplemental selenium, which is also referred to as organic selenium. Selenium yeast is produced using the microorganism *Saccharomyces cerevisiae*, which is better known as baker's yeast or brewer's yeast. When the yeast is grown in a selenium-enriched medium, it absorbs the selenium and converts it into the form of selenium naturally found in foods, selenomethionine. The final product is used to fortify foods, fodder and to make supplements.
