## Abstracts

'An oxygen concentrator is a medical device which is designed to deliver a concentrated flow of oxygen to a patient. Portable oxygen concentrators are small, lightweight and more convenient for the patients.

In fact, oxygen concentrators are rather simple devices. They operate on the principle of 'rapid pressure swing adsorption' of atmospheric nitrogen onto specific minerals and then venting the nitrogen. The filtered gas mixture is mainly oxygen and little other gasses like argon and CO<sub>2</sub>.'
