Abstracts

Shea butter is an edible vegetable oil or fat, extracted from sun-dried kernels of the African shea tree. Shea butter is extensively used in cosmetics, health products and in the confectionery and chocolate industry (as an ingredient in cocoa butter alternatives). Shea butter and its fractions can also replace other edible vegetable oils or fats in other food applications. Shea butter is used for body, hand and facial products because of its unsaponifiables content. Shea butter contains ester resins recommended for damaged skin repair, cleansing and the sun's protection.
