## Abstracts

TDAE is a kind of aromatic extract as a raw material for tyres, and is a DAE that is further refined to meet the HSE criteria. This makes it the alternative that most closely resembles DAE from a chemical perspective. MES is mildly refined paraffinic base oil, sufficiently refined to meet HSE requirements, but not as closely related to DAE as TDAE, and therefore it doesn't display characteristics and performances as similar to DAE as TDAE does.
