The demand for nuts is ever increasing, and so is the production. This is because nuts are beneficial to human health and are an excellent source of protein, vitamins, and antioxidants. Nuts also help control the sugar level in the body. The demand for nuts outweighs the production which is leading high consuming countries to import from high producing countries. Although there is a significant increase in the production, there are also factors that hinder the production. These include global warming, unfavorable climate, and desertification.
