Nylon non-absorbable sutures are widely used in surgical procedures where long-term tissue support is required. Made from polyamide (nylon), a synthetic polymer known for its strength and durability. Designed to remain in the body indefinitely unless removed, providing extended support to the healing tissue. Nylon non-absorbable sutures are a reliable and versatile choice for surgical procedures requiring durable, long-term tissue support. Their high tensile strength, minimal tissue reaction, and availability in both monofilament and braided forms make them suitable for a wide range of applications.
