Odor Absorbing Dressings are medical dressing specially designed to treat wound odor. This dressing can quickly and effectively absorb exudate, inflammatory secretions and rancid gases from the wound surface through specific adsorbent materials, such as activated carbon, thereby eliminating or reducing the odor produced by the wound. The use of odor absorbing dressings can not only improve the quality of life of patients and reduce their psychological burden, but also provide medical staff with a clearer and non-interfering wound observation environment, which helps to more accurately assess the wound condition and formulate appropriate treatment plans.
