According to our (Global Info Research) latest study, the global OEM & ODM Cosmetics Manufacturing market size was valued at US\$ 30350 million in 2023 and is forecast to a readjusted size of USD 41380 million by 2030 with a CAGR of 4.3% during review period.

Cosmetics OEM (Original Equipment Manufacturer) and ODM (Original Design Manufacturer) are two essential models in the cosmetics industry that allow brands and retailers to create and launch their own cosmetic products without having to engage in the organization or running of a factory.

The demand for personalized and niche products is growing, and consumers are increasingly looking for personalized beauty products tailored to their individual skin types, concerns, and preferences. Brands are turning to OEM/ODM partners to develop specialized formulas or customized packaging to meet these needs. Many brands are exploring niche markets (e.g., vegan, organic, cruelty-free, clean beauty), and OEM/ODM can provide ready-made solutions that cater to these specific segments.

The growth of e-commerce requires faster product development cycles and responsiveness to market trends. OEMs and ODMs can help brands quickly launch new products to take advantage of online shopping trends. Brands are increasingly leaning toward a DTC model, which allows them to establish a direct relationship with consumers. OEMs and ODMs support these initiatives by providing flexible manufacturing solutions and small-batch production capabilities.

Advances in cosmetic formulation technology have enabled the development of more effective and diverse products. OEMs and ODMs often invest in R&D to create innovative solutions that meet changing consumer expectations. The introduction of automation in the manufacturing process can improve production efficiency, capacity,

and quality control, making cooperation with OEMs and ODMs more attractive. Outsourcing production can reduce production costs because manufacturers are often able to produce in batches, reducing production costs and labor costs. This makes OEM and ODM a cost-effective choice.
