Abstracts

According to our (Global Info Research) latest study, the global Optical Disk market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

According to IDC's forecast, China's data circle will become the world's largest data circle in 2025. Cold data storage mainly considers long-term low cost and stability, and Blu-ray storage has relative advantages in these two points, so it has become an important choice for cold data storage. Since 'hot' data requires a faster response time and will naturally convert to cold data, optical-magnetic hybrid storage has become an important development trend. Magnetic storage corresponds to 'hot' data, and optical storage corresponds to 'cold data'. This trend It provides a broad development space for the Blu-ray storage industry.
