According to our (Global Info Research) latest study, the global Oseltamivir Phosphate API market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Oseltamivir Phosphate API is a neuraminidase inhibitor, which means it works by blocking a viral enzyme called neuraminidase that is essential for the influenza virus to replicate and spread throughout the body. The API form refers specifically to the pure, chemically synthesized substance that serves as the core component of the final drug product. This substance is then formulated with other ingredients, such as binders, fillers, or coatings, to create the tablets, capsules, or liquid suspensions that patients take.

The global pharmaceutical market is 1475 billion USD in 2022, growing at a CAGR of 5% during the next six years. The pharmaceutical market includes chemical drugs and biological drugs. For biologics is expected to 381 billion USD in 2022. In comparison, the chemical drug market is estimated to increase from 1005 billion in 2018 to 1094 billion U.S. dollars in 2022. The pharmaceutical market factors such as increasing demand for healthcare, technological advancements, and the rising prevalence of chronic diseases, increase in funding from private & government organizations for development of pharmaceutical manufacturing segments and rise in R&D activities for drugs. However, the industry also faces challenges such as stringent regulations, high costs of research and development, and patent expirations. Companies need to continuously innovate and adapt to these challenges to stay competitive in the market and ensure their products reach patients in need. Additionally, the COVID-19 pandemic has highlighted the importance of vaccine development and supply chain management,

further emphasizing the need for pharmaceutical companies to be agile and responsive to emerging public health needs.
