Distributed Control Systems (DCS) are advanced control systems used in industrial automation and process control. They play a crucial role in managing complex processes, ensuring safety, and optimizing efficiency. DCSs are used in several industrial facilities like pharmaceutical manufacturing, oil refineries, chemical plants, and petrochemical plants.

DCS allows prompt monitoring and control of various plant processes by distributing control tasks across multiple controllers. DCS provides a more flexible and scalable solution compared to traditional centralized control systems. This enables industries to adapt to changing requirements and maintain high levels of performance and reliability.
